

# We're Committed to the Communities We Serve.

As the region's leading healthcare system, the Stellaris Health Network Hospitals – **White Plains Hospital Center**, **Northern Westchester Hospital** in Mount Kisco, **Lawrence Hospital Center** in Bronxville and **Phelps Memorial Hospital Center** in Sleepy Hollow – are deeply committed to serving the local community.

Over the past several years, Stellaris Hospitals have made significant investments in facilities and equipment including new and expanded emergency departments. Stellaris Hospitals have also received national recognition for their implementation of information technology to improve patient safety and quality of care.

By reinvesting tens of millions of dollars in the local community, Stellaris Hospitals are able to continue to provide the highest quality medical services possible to the communities we serve. These major investments also help create much-needed jobs in a difficult and challenging economy.

In order to maintain our position as the leader in quality health services, Stellaris Hospitals need an adequate revenue base, one that is founded on fair and reasonable reimbursements from health insurance companies.

During these times of continued cutbacks in healthcare reimbursement at the federal and state levels, we cannot maintain a relationship with any payer which reimburses our hospitals at rates that could materially affect our ability to deliver high quality care and impair our ability to meet our charitable mission.

The Stellaris Hospitals remain steadfast in their commitment to providing the finest quality community based healthcare.
